

Fueling contemporary research through the management of well-characterized biospecimens

NovoBioBank supports the capture, standardization and organization of wide ranging relevant data – both patient/donor and biospecimen oriented – providing secure access to well-annotated biospecimens, while maintaining confirmed chain of custody. A well-administered biobank is critical for conducting high-quality sophisticated biological research, and NovoBioBank provides all necessary tools.

- Intuitive software solution, based on user-designed specs
- Fully customizable
- Secure, scalable multi-facility system
- User-defined annotation and query criteria
- Capture, standardize and organize all relevant data
- Effortless collaboration between multiple sites
- Stand alone system or interface seamlessly with LIS and CRIS
- On-the-spot reporting for order status, inventory, shipping, maintenance and billing

Manage and Track Data

Through all phases of the biospecimen life-cycle

Search capacity through all data levels:

- Case + Related Cases
- Informed Consent
- Patient Demographics
- Clinical History
- Specimen Parameters
- Assay/Test Results
