

### Introducing NovoBilling™:

Electronically send claims, post payments, and invoice patients for all your Anatomic Pathology billable services.

Eliminate the need for an independent billing company or maintaining additional billing software requiring double-data entry.

NovoBilling™ eliminates the potential for double-data entry while providing your lab with capabilities such as electronic claims and payment processing, patient invoicing, and accounts receivables management. NovoBilling™ helps your lab focus more on client relationships and less on just processing and posting claims. If you're considering upgrading your AP LIS or if you're using a billing service, consider the potential workflow enhancements and the re-capture of lost revenues by bringing billing in-house with NovoBilling™ and upgrading to NovoPath™, Anatomic Pathology software platform, for one powerful combination.

- NovoBilling™ reduces DSOs by reducing the claims denial rate. NovoBilling™ does an initial “scrub” of patient data to inform you of incorrect or missing information prior to sending the claims.
- NovoBilling™ provides timely and accurate reporting for payments invoiced and received by patient, case or individual CPT. It also includes batch Electronic Explanation of Benefits payments.
- Provides detailed management reports to provide the visibility that an efficient lab requires. Whether your lab needs a breakdown of revenue by physician or by payer, NovoBilling™ has the reports you need.
- Processes re-billing of claims that have been partially paid or that have been denied.
- NovoBilling™ also supports eligibility verification.

The screenshot shows the 'Enhanced Billing Manager - NovoPath.com' interface. It features a search form with fields for SSN (999000368), Patient Last Name (Barton), DOB, and Gender (M). Below the form is a table with columns: Case Number, Guarantor, DOS, Balance, Do not bill, Collection, Primary, and Se. The table contains two main rows for case numbers GU10-00022 and GU10-00015, each with a sub-row for CPT codes (88305) and specimen types (A-F). The CPT codes are associated with dates of 9/8/2010. A 'Patient' link is visible at the bottom right of the table.

*NovoBilling™ will help your staff focus more on client relationships and less on just processing claims and posting payments*
