

Introducing a truly Web-Based Reporting solution for Anatomic Pathology laboratories

NovoPath™, a leading AP Software Platform, now offers a simple and direct way for Pathologists to enter their results and electronically sign cases, order additional stains and levels, run statistical reports and take advantage of a broad range of NovoPath™ features from any remote location using any available web browser and an internet connection.

- Supports pre-defined macros, including microscopic and diagnosis text entry and can work with your lab's medical dictionary and voice recognition systems for consistent ease of data entry.
- Provides multiple screen layout options to maximize data entry efficiency and to fit your style of working.
- Immediately communicates remote orders for additional stains and levels to lab personnel for timely execution.
- Provides convenient management of frozen section diagnosis, amendments, addenda, and billing from a single screen.
- Automatically schedules the case for delivery to a clinician's EMR and other delivery preferences after electronic sign-out.
- For labs that offer technical services to facilities retaining their own pathologists, Web Reporter provides a HIPAA compliant means to diagnose, report, deliver and bill for services for each specific facility's patients.

With real-time data access, Web Reporter brings a new level of convenience and flexibility to AP reporting and workflow management!
